

People's Party Ticket.

For President,
WILLIAM JENNINGS BRYAN.
 For Vice President,
A. E. STEVENSON.
 For Presidential Electors,
 Joseph B Fugate, Harvey county,
 R W Turner, Jewell county,
 Jas Beck, Cherokee county,
 James Falloon, Brown county,
 J D Goshorn, Allen county,
 Frances M Brady, Labette county,
 Taylor Kiddle, Marion county,
 C P Carstenson, Republic county,
 Charles H Nicholas, Osborne county,
 H J Roetzel, Barton county.
State Ticket.
 For Associate Justice,
DAVID MARTIN,
 of Atchison county.
 For Governor,
JOHN W. BREIDENTHAL,
 of Shawnee county.
 For Lieutenant Governor,
A. M. HARVEY,
 of Shawnee county.
 For Secretary of State,
ABE FRAKES,
 of Trego county.
 For State Auditor,
E. J. WESTGATE,
 of Finney county.
 For State Treasurer,
CONWAY MARSHALL,
 of Anderson county.
 For Superintendent of Insurance,
WEBB McNALL,
 of Smith county.
 For Attorney General,
H. P. FARRELLY,
 of Neosho county.
 For Superintendent of Public Instruction,
LEVI HUMBARGER,
 of Dickinson county.
 For Congressman at large,
J. D. BOTKIN,
 of Cowley county.
 For Congress, 6th Congressional district,
J. B. DYKES.
 For Senator, 40th Senatorial District
N. B. McCORMICK.

County Ticket.

Representative.....**G. E. UTTER**
 Superintendent.....**W. B. GARDNER**
 Clerk of the Court.....**J. S. WARREN**
 County Attorney.....**FRANK McKAY**
 Probate Judge.....**H. D. BROTHERS**
 Commissioner.....**THOS. DONOVAN**

Senator Peffer wants it distinctly understood that while he is speaking for McKinley he is not supporting the Leland-Barton-Stanley crowd on the state ticket.

There is absolutely no politics in the office of county commissioner save in the letting of the contract for county printing. Do the voters of the county care enough for that item, to influence them to vote against their own interests—against their own pocket-books in this matter?

Let's see, isn't Henry Allen, who speaks here Saturday, the editor who crawled up above the ceiling to try to eavesdrop an Alliance meeting in 1890 and fell through the plastering? Wonder if he will tell about it in his speech?

This county has twelve or fifteen very healthy and enthusiastic Bryan and Breidenthal clubs. Not one McKinley club has been organized, and as to Stanley—why his name isn't thought of, in connection with political enthusiasm.

Do you want J. R. Burton for United States Senator? If not you had better not vote for Evan Hebrew or E. V. Peterson. They both stand pledged to the support of the Abilene statesman whom O. Leland says owes everybody who ever trusted him.

Remember to cast your vote to the best interests of the tax payers when you come to consider the candidates for county commissioner. Mr. Donovan stands for those interests, and if elected all parties will receive fair treatment, and the expenses of the county will be kept within proper bounds.

As is usual when he is badly whipped Mr. Royce tries to dodge behind a made-to-order "private conversation." If he could hear how the business men and others—all his political friends—are laughing at him he would not manufacture so many "private conversations" which everybody knows never occurred. The Herald would not have mentioned the matter at all save for the bare possibility that the Dispatch article might be construed to reflect upon Mr. Ransom's truth and veracity. Not only did the Herald not hold any such conversation with Mr. Royce, but further, the Herald editor has full confidence in Mr. Ransom and never for a moment doubted the truth of his statements. Besides, Mr. Royce's own article proves the truth of the matter, for if it was not so why does he not tell the people at what hour the postoffice does close? So far as the Herald is concerned the "incident is now closed."

George Gould's Assertion.
 Millionaire George Gould has returned from Europe and makes the gleeful assertion that all foreign bankers and financiers earnestly hope that President McKinley will be re-elected. There is absolutely no doubt about the truth of the remark. Under the present administration our national finances, and in fact all other policies in which Europe is concerned, have been conducted so absolutely in their interests that they naturally hope for its continuance. Under these policies the natural productive energies and resources of the country have been made subservient to foreign control. They have been so managed as to permit enormous fortunes to be amassed, and these in turn are being loaned to European monarchies. The

American producer is working in order that the profits on his industry may be concentrated in New York and then transmitted to European capitals—\$25,000,000 or more to England; \$20,000,000 to Germany; \$10,000,000 to Russia, with Sweden negotiating for \$10,000,000. No wonder European bankers want a continuation of a national financial and industrial policy that renders such drafts on America possible. Unable longer to themselves meet the drain of their modarchical systems, and their huge military establishments, they naturally rejoice in their ability to replenish their stocks of cash by selling bonds of the United States, and hope no political revolution in this country will disturb the extremely satisfactory situation in which they find themselves, because of President McKinley and his policy. Mr. Gould's truthful assertion should make hundreds of thousands of votes for Bryan. —Rocky Mountain News.

A Thousand Tongues
 Could not express the rapture Annie E Springer, of Philadelphia, when Dr King's New Discovery cured her of a hacking cough that for many years had made life a burden. "After all other remedies and doctors failed it soon removed the pain in my chest and I can now sleep soundly, something I can scarcely remember doing before. I feel like sounding its praises throughout the universe." Dr. King's New Discovery is guaranteed to cure all troubles of the throat, chest or lungs. Price 50c and \$1. Trial bottles free at Geo James and Co's drug store.

W. C. T. U. at Beloit.
 The twenty-second annual convention of the Womens Christian Temperance Union met in Beloit, Kans., last Wednesday morning a week ago and continued in session three days. Mesdames Fannie Whitney, Mary McFall of Phillipsburg, Manette Tinney of Kirwin, and Anna Tracy of Logan were the delegates present from this county. The programs of each of the sessions were filled with good papers and able speeches. The district presidents, seven in turn, gave a synopsis each of the work in their fields, and excellent work has been done in the varied lines. The outlook hopeful. Fifteen field workers have delivered 529 public addresses. The paid up membership in the state is 3152. Forty-three L. T. L.'s are reported with a membership of 1241. Many thousand pages of temperance literature have been distributed; in the miners' department alone 211,888 pages have been sent out, besides a box of 100 pounds of weight and one barrel of magazines and papers sent for miners' reading. Statistical reports are to appear in state minutes, soon to be published. Other reports and lectures were equally interesting and instructive.

Mrs. Tracy was chosen county president for this county, and Mrs. Tinney 6th district president. Mrs. Whitney and Mrs. McFall returned Saturday morning, very enthusiastic for the next year's work.

To Stop A Cold
 After exposure or when you feel a cold coming on, take a dose of Foley's Honey and Tar. It never fails to stop a cold if taken in time. Geo. James & Co.

Big Creek.
 More rain, more wheat!
 Mr and Mrs N B Homan visited at Mr Tomberlin and other friends on Big creek this week.

Irene Johnson and Walter Judd are each the possessors of new wheels nowadays.

M P Cannon delivered a political speech at the Valley one evening last week. Those who were present say it was fine.

The young people are looking forward to a jolly time at Mr. Frows Friday night.

We hear that Rev Charles Buell, one of our old valley boys was married a short time since. Charley has a host of friends on Big creek who extend to him their congratulations and best wishes.

Walter Babcock wants to attend college this winter, he thinks the Valley has the best corps of teachers.

Mr Morse has rented F E Trows farm for this season.

Fred Hendrickson has returned from Russell county, where he has been visiting his uncle.

Tula Dreanna has returned to Phillipsburg.

**COLE'S

 COAL.**

Dayton.
 J M Tadlock and C M Cole addressed the Bryan club at the Hopper school house last Thursday night. There was a large and enthusiastic crowd.

Joseph Friant is building a bridge across Bissell creek.

G R Gregory had the misfortune to get his foot hurt while grading the road.

G H Tannahill is erecting a windmill on his new farm.

George Tannahill is buying stock hogs just from force of habit you know.

Nauca.
 Mr. Pawling sold his farm for \$1,700.

Mrs. Fouts is very ill again.

Mr. Harrison and family have gone to Missouri, overland.

Mr. and Mrs. Hewson had quite a long visit in Iowa.

Two or three of our teachers will take the examination Saturday.

Mrs. Evan Hebrew made pleasant calls in the vicinity last Friday.

It is said Arch Cottrill will soon move near Bankleman, Neb., to take care of Mr. Hester's cattle. He will be missed.

Food for reflection is found in the statement that the operators of 4 great mining companies in the east had decided to advance employes' wages 10 percent and reduce the price of powder from \$1.75 to \$1.50 per keg. Just pause a moment, almost half! How many dinner pails would that fill? Or how many dinners for loved ones at home would it provide? Neither does any one doubt that \$1.50 includes a fair profit.

Last weeks K C Star has a pointed truth about the tariff on boots and shoes.

Bismarck's Iron Nerve
 Was the result of his splendid health. Indomitable will and tremendous energy are not found where stomach, liver, kidneys and bowels are out of order. If you want these qualities and the success they bring, use Dr King's New Life Pills. Only 25 cents at Geo James & Co's drug store.

Logan.
 The long dry spell was broken Saturday night and Sunday by a splendid rain which was badly needed.

Hon J M Senter of Topeka, spoke to a large and attentive audience at the opera house Friday evening under the auspices of the peoples party. He dealt with state matters, public ownership of public utility, trusts, the money question and the war in the Philippines. His speech was to the point and he was heartily applauded.

The democrats and populists are enthused over politics as they never for a were before, and the outlook fusion victory through nation, state and county is flattering.

Editor Baffington was present at the Senter speaking with his tables and pencil taking items for his famous paper "The Logan Republican"; consequently, we expect to have Mr. Senter's speech revised in Editor Baffington's own language next Thursday.

Dr Brothers fusion nominee for probate judge was in Logan Saturday shaking hands with his political admirers. He left a good impression with the people.

J M Tadlock editor of the Herald accompanied the Hon J M Senter to this place Friday afternoon.

Dye & Son have another stone

building, 50x80 feet, near completion; which, when finished will add greatly to the appearance of our little village.

Mrs H L Emery has gone to house-keeping again. her sister, Mary, and Miss Pahlbrook, our primary teachers, will stay with her.

Quite a number of our young people attended a social at O'Connells Friday night.

J J Wiltrout and Thomas Brown are adding additions to their dwellings, which will give them more room and also add greatly to the appearance of their property.

C O Graham is one of that class of men who voted for Bryan in 1896, but now says he is going to support McKinley this fall. Charley believes in the trusts, imperialism and the Hena administration.

Mary Ray is assisting in the post-office on Saturdays and Sundays, and we understand she is to have a permanent position there after her school closes.

There is a class of "would be" boys and young men in this town that it would be well for the marshal to look after. It is no uncommon thing to find a gang of them carousing the streets, of nights, under the influence of intoxicating liquor. This is a question that every moral citizen of Logan should be interested in; and steps should be taken forthwith to have it stopped. A curfew law would be a wise thing for the council to pass.

Logan is indeed of another meat market, some one would do well to go into the business.

A Card.
 The manufacturers of Banner Salve have authorized the undersigned to guarantee it for burns, cuts, sores, ulcers, tetter, eczema and all skin diseases. You have your money back if it does not do all it claims. Geo James & Co

BADEN-POWELL'S SWORD.
 One of the finest ever made Now Belongs to the Hero of Mafeking.

One of the finest swords ever made has recently been presented to Gen. Baden-Powell, the hero of Mafeking, by the citizens of Port Elizabeth, in South Africa. The hilt of the sword is of fine gold, and is surmounted by the head of a lion. The guard, also of fine gold, is richly decorated, and has the monogram, "B. P." on one side and the arms of Port Elizabeth on the reverse. The scabbard is of scarlet velvet, richly adorned on the upper portion with the arms of Cape Colony, enameled in proper colors, and an African lion in fine gold. The center band on the scabbard has the words, "Mafeking, 1899-1900," inclosed in victors' wreaths. The "shoe" is also composed of fine gold, and has a medallion on one side with the representation in the upper part of the colonel's well-known campaigning hat, rifle, and emblems of literature, art and science. Below these are groups of cannon and palms, with the motto: "Palmas qui meruit ferat." The blade is of fine steel richly etched in elaborate style with a number of symbols illustrative of the life of the gallant general, and bears the following inscription: "Presented by the citizens of Port Elizabeth to Maj. Gen. Baden-Powell in commemoration of the gallant defense of Mafeking, 1900. M. Gumpert (mayor), W. P. Pinn (town clerk)." The whole work is executed in the best possible taste and is a fine specimen of the goldsmith's art.

ASCENT OF MOUNT ARARAT.
 The Spot on Which Noah's Ark Rested is Very Difficult to Reach.

The Ararat mountains in Armenia comprise two peaks situated seven miles apart. They are known as Great and Little Ararat and are respectively 17,260 and 14,320 feet above the plain, says the Scientific American. They partially belong to three countries—Russia, Turkey and Persia. The

mountains are covered on the tops with perpetual snow, ice and glaciers. The summit of Great Ararat was reached in 1820 by Prof. Parrot, and on September 2, 1900, a member of the Russian Geographical society named Peoggenpohl ascended the peak with a considerable party. The difficulties of the ascent are very great and his successful expedition will be welcome news in geographical circles. Ascents are rare, having been made in 1834, 1843, 1845, 1850 and 1855. Little Ararat is even more difficult to climb, as its declivities are greater and steeper, its form being almost conical. It is believed to be the spot where the ark rested, but there is a tradition that Mount Judi, in southern Armenia, was the spot. The mountain is of volcanic origin and was in eruption in 1785, and in 1840 there was a vast discharge of sulphurous vapors from its sides and a tremendous earthquake shook the surrounding country. There is considerable literature devoted to the mountain.

ECONOMY IN GUN TESTING.
 Heavy Artillery Practice Would Be Too Costly If Full Charges Were Used.

The method used in the United States navy for the economical training of the gunners is very interesting. It is a well-known fact, says the Washington Star, that the cost of firing one of the large guns used in the navy is very great, amounting sometimes to \$1,000 or more. To save this expense a very simple method is employed. In the case of the large guns an ordinary Remington rifle is secured in the breech of the gun and directly in the center of the bore, so that when it is fired its bullet takes the same direction as that of the regular projectile. The large gun is sighted in the usual manner. On account of the lesser velocity of the small bullet the target is placed close to the ship and is made correspondingly small.

The method used for the six-pounder or other small guns is slightly different, as instead of the small rifle a wooden or dummy cartridge, the same size as the regular cartridge, is employed. Through the center of this wooden cartridge runs a rifle barrel which is loaded with a 44-caliber cartridge.

TOPAZ IS MUCH FAVORED.
 This Beautiful Gem is Highly Prized by Fashionables at Present.

"Not the least beautiful of the many semi-precious stones for which there is always a large demand is the topaz," said a wholesale dealer in gems to a Washington Star writer. "The name topaz suggests only a yellow stone, yet there are light blue, brown and green varieties which are frequently sold as aquamarines. The genuine aquamarine may, however, be easily distinguished from a topaz, as the former stone more closely resembles the color of green sea salt. Besides, the topaz admits of a higher polish, and is extremely slippery to the touch. Strange to say, the yellow topaz when slightly heated, becomes pink; heated further, the pink grows paler, and by long heating it is entirely expelled, leaving the green colorless. The sherry colored or brown topaz is bleached in a very short time by the rays of the sun or strong daylight, and all the white topazes found in nature have been colorized in this way. The topaz is found in granite rocks in Siberia, Japan, Peru, Ceylon, Brazil and Maine and in volcanic rocks in Colorado, Utah and New Mexico."

The Ideal Light.
 Electricians confidently expect that their art will at a future day bring the cost of illumination down to a mere trifle compared with what it now is. As is well known, the most economical methods of lighting involve a waste of nearly all the energy utilized. Prof. Langley says that the ideal light is the firefly, which is produced without heat or waste. If man could imitate it he would solve one of the most interesting and important problems.

Improving Poor Whites.
 Cotton mills in the south are attracting illiterate whites from the country, where they have never had opportunity of amounting to much, and are making new men of them. As a result it begins to look as though the next generation of "po" white trash" in the south will be a vast improvement on those who have preceded them.
