### GEOGRAPHICAL LOCATION OF BLEEDING ARMENIA

Ararat The Hub of The Country Despoiled By The Unspeakable Turk.

(Davenport Democrat.)

If you have been a little vague in your geographical conception of where it is that the Armenians are being massacred, you will recognize the place at once when we say that it is aroused old Mt. Ararat, where Noah landed with the ark.

Ararat is the hub of Armenia, the National Geographical Society tells us. It is the center of what has always been one of the earth's most troubled areas. It is one of the most impressive of the earth's mountains, for it rises sheer to the clouds out of an immense plain, with no neighboring peaks to soften its isolation and to take from it majesty. A mighty Mt. Everest is set well within a massive sky-touching range of mountains; Mt. Blanc is merely one of several imposing fellows, but Ararat stands up, with only a background of sky and plain and a frame of little mountains, a splendid thing without a peer. The dominant mountain is split into two peaks, Great Ararat rises to a height of 17,000 feet above the level of the sea.

A vast wealth of legend surrounds the mountain, which has always deeply impressed the imaginations of the people who have wandered past or settle beneath it. The Armenian priests long believed that the wonderful mysteries of its summit might never be surveyed by human eyes and all thought of scaling Ararat was considered almost in the light of sacrilege. The Armenians also have held that they are the first people after the flood, the immediate descendants of Noah, so to speak, for the first village that Noah founded after abandoning the ark was Nakhichevan. So the Armenian thinks that his people were the first race of men to grow up in the world after the flood.

The name Ararat means "high." The Persian name for the mountain, Koh-i-Nuh, means "Noah's Mountain." It has been determined by the natives that the Garden of Eden was placed in the valley of the Araxes, a valley which at the present time enjoys blessings that go far toward strengthening its wonderful claim. Noah's wife was buried in this valley near the mountain, and grapes are still grown there, whose vines are said to be the direct descendants of vines planted by Noah.

The war, which is no respecter of traditions, or religions, or nations, is laying its bloody hand on Armenia, around Mount Ararat, just as it has laid it upon a dozen countries, some others of which are involuntary participants in the struggle.

Varnish as a Bedbug Cure. Varnish is death to the most persistent bedbug. Ten cents' worth will do for one bed. Thin with turpentine and apply with a paint brush, getting it in all the corners, ends of the slats and springs where they hide. Every corner should receive attention. This plan was followed by a hotel woman for ten years with success.

Scene of Much Fighting. With the exception of Gibraltar, Constantinople has probably experienced more fighting right up to its walls than any other important town in the world.

### SHINBONE SUBSTITUTED FOR VERTEBRAE.

A case of surgery calculated to strike wonder among the laity has just been reported from St. Joseph's hospital in this city. A young woman operator for the Fayette Telephone Company is recovering her health after having had six inches of her tibia bone substituted for four vertebrae. Furthermore, the surgeon is growing a new shinbone to take the place of the one needed in the operation.

Some time ago the young woman became partially paralyzed as the result of caries of the spine. Four of the vertebrae were involved in the process of disintegration and eventually the column itself buckled. Four weeks ago the rare operation of substitution was decided upon as a last resort.

One-half of the shinbone was chiseled off, and the half-foot bone was morticed into sound vertebrae above and below the affected sections. The diseased vertebrae, which enclosed the spinal cord, were cleft and secured to the inserted shinbone. The patient then was put in a plaster cast.

The second day the paralysis disappeared. Within a short time a pronounced gain in weight necessitated the cutting away of the cast and the fitting of a fresh one. The gain continued, and another cast had to be provided.

In cutting out part of the shinbone, the surgeon laid back the periosteum, the membrane which produces bone growth. This was carefully replaced on the remaining portion and now a substantial new growth of bone is apparent. The union of the inserted bone with the vertebrae has been established and the patient is able to sit up in bed. The surgeon in the case says that her improvement gives promise of her restoration to normal health.—Lexington Leader.

### B LINE PROGRAM IS ANNOUNCED

Select Route at Evansville Thursday—General Meeting at Grand Theatre.

Evansville, Ind., Nov. 3.—The program for the Dixie Bee Line convention Thursday was mapped out at a conference of Mayor Bosse, president of the Dixie Bee Line association, and its secretary, John C. Keller.

The general meeting will be held in the New Grand theatre and between 500 and 800 people are expected for this. Good roads talks will be made and greetings will be extended by the president.

The officials of the association will meet in the banquet room of the Vendome hotel in the afternoon to select the official Bee Line. At this meeting, and previous to taking up the route selection, counties desiring to join the association, will be given ten minutes each to present their claims.

The program: Thursday morning, 9 o'clock—Address of welcome by Mayor Bosse.

Music by Noble's Gibson County Dixie Bee Line quartet.

Good roads lecture by J. Napier Dyer, of Vincennes.

Other talks. Music.

2 p. m.—Meeting of officials for route selection.

6:30 p. m.—Dinner at Vendome for officials of the association, given by the Evansville Business Men's association.

The only persons who will actually have a vote when it comes to deciding the official route will be nineteen county vice-presidents. These are:
