ON LOFTY ARARAT Beautiful Mountain Is a Long-Extinct Volcano. It Has Been Scaled, and, Contrary to Tradition, No Proof That Noah's Ark Ever Landed There Could Be Discovered.

The recent appeal made by the newly established republic of Ararat for recognition by the United States will be better understood, at least geographically, when it is explained that the region in question is a province of Armenia.

The whole world, according to the Bible story, was submerged during the period of the Deluge and Ararat's top-most peak was the first dry land to appear above the waters, for the simple reason that it was the loftiest in Armenia, at all events.

Ararat comes pretty near to being the most beautiful mountain in the world. It is a long-extinct volcano, standing almost isolated save for a lesser peak, called Little Ararat, which (really part of it) is a cone of equal size, symmetry—an ideal volcano of a type plainly recognizable as an ash pile formed about an eruptive chimney.

Greatest Illus is Congenial Work. There is no greater happiness in life than doing the work you love. It matters not what the work is—to some women it is embroidery, or writing a book, or baby tending, or studying chemistry, or cooking, or keeping a house polished. It does not always happen that we have great ability in the thing we enjoy doing—although the chances are that this is so.

They Surprising Way. "I was never more disappointed in anybody in my life than I was in my cousin up to Kay See," admitted Gabe Gossnell of Ordway, who was just back from a visit to the Big Bush. "Why, with everything on earth going on and anything you could think of liable to happen at any moment, I'll be switched if they don't poke off to bed at between 9 and 11 o'clock every night of the world!"—Kansas City Star.

SAYS "CHARMERS" ARE FAKES Writer Describes Method by Which East Indians Play on Ignorance of Their Fellows.

A method by which snake charmers dupe ignorant people in India is thus described: One of them puts a harmless snake, in a stupefied condition, into a basket, and his companion then tells the women of the house that he has noticed a poisonous snake there. The people are alarmed and offer a reward to the snake charmer to remove the snake. He declares it to be a deadly poisonous one and asks a good sum of money for the expert, which, he says, may cost him his life.

NURSE HAD INGENIOUS IDEA Surely If Use of Makeup Was Ever Justified, It Could Be Defended in This Case.

A laugh is going the rounds over the stunt pulled by one of the attendants at the orphanage who had waxed enthusiastic in the work of finding parents for her little charges. On this particular occasion she had interested a young couple in a three-months-old baby and they had promised to call the following day with a view to taking the infant if she was the dainty dimpled cherub the attendants said she was.

Hundreds Visit The Aeroplane Exhibit The United States Airplane Engine that is being exhibited and demonstrated at 1410 Main street, Dallas, is the mechanical marvel of the age according to the comments going the rounds of expert opinion.

Our new valve system makes this engine absolutely fool-proof and needs no expert to operate it—besides it will be an ideal kerosene-burning engine. Further than that we cannot say at the present time, excepting to state that, under and by reason of the new improvements, the engine may be used in units composed of from three to forty-two (3 to 42) cylinders; and said cylinders being the size from 2 1/2-inch bore 9-inch stroke. Too much importance can not be made of the Long Stroke. It makes AIR COOLING PRACTICAL FOR LARGE POWER UNITS, INCREASES THERMAL EFFICIENCY and gives HIGH PISTON SPEED without too high rotative speed, which in turn reduces the centrifugal strains and frictions to a minimum, besides reducing the pounding impulses due to the explosions.
